

## CATALUNYA SQUARE POOL LANDSCAPE IMPROVEMENT IN CASTELLAR DEL VALLÈS

In August 2006 the Castellar del Valles Council carried out a landscape improvement of the Catalunya square pool with vegetated Fiber roll™ and Plant pallet™. Bags type Deltalok™ are used in order to improve the installation of these bioengineering structures. With these bags the plants are not able to be submerged and at the same time it is increased the surface for the plant to develop and take root. This artificial pool with no quality habitats, concrete edges and straight walls becomes a high lanscape quality pool with a exceptional floral richness
